

7th WHRN Research Symposium

Registrations are open

The sixth event in our virtual 2020 WHRN symposium showcases a diverse range of local rural and regional research in line with this year's symposium theme "*by us, for us, with us*".

In line with this year's theme "by us, for us with us", the network have taken the opportunity to extend beyond the traditional conference ePoster! Along with the invitation for health research projects, we have invited community organisations and service providers to showcase a program or a service with an ePoster.

Don't miss this great opportunity to hear about research and programs conducted by the Western NSW Primary Health Network, Western NSW Local Health District acute, telehealth and community services, Cancer Care Western NSW and university supported research.

[Download the abstracts and speaker biographies](#) from our website.

This is a free 90-minute event.
